DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to eight elements each having two, three or four patentably distinct species of the claimed invention:

- I)
 - a) at least one X layer comprises positively birefringent material [claim 2];
 - b) at least one X layer comprises negatively birefringent material [claim 3].
- II)
 - a) the tilt angle θ of the optic axis with respect to the x-y plane of at least one X layer is constant in the thickness direction of the X layers [claim 4];
 - b) the tilt angle θ of the optic axis with respect to the x-y plane of at least one X layer is changes in the thickness direction of the X layers [claim 5].
- III)
 - a) the azimuthal angle ϕ of the optic axis of at least one X layer is constant in the thickness direction of the X layers [claim 6];
 - b) the azimuthal angle ϕ of the optic axis of at least one X layer is changes in the thickness direction of the X layers [claim 7].
- IV)
 - a) the adhesion promotion layers is disposed within the compensation film [claims 9-11];
 - b) the alignment layers is disposed within the compensation film [claims 12-13];
 - c) the barrier layer is disposed within the compensation film [claim 14].
- V)
 - a) Z layers function as adhesion promotion layers [claim 15];
 - b) Z layers function as barrier layers [claim 16];
 - c) Z layers function as alignment layers [claim 17].

Art Unit: 2871

- VI) a) X layers function as adhesion promotion layers [claim 18].
b) X layers function as barrier layers [claim 19].
c) X layers function as alignment layers [claim 20].
- VII) a) liquid crystal cell is an Optical Compensated Bend mode cell [claim 28];
b) liquid crystal cell is a Twisted Nematic mode cell [claim 29];
c) liquid crystal cell is a Vertical Aligned mode cell [claim 30].
- VIII) a) Z layers comprises a polymer containing in the backbone a vinyl, carbonyl, . . . , or azo group [claim 31];
b) Z layer comprises a polymer containing a non-visible chromophore group, . . . , or thiophene group [claim 32].
c) Z layer comprises poly(4,4'-hexafluoroisopropylidene-bisphenol) terephthalate, . . . [claim 33] ;
d) Z layer comprises poly(4,4'-hexafluoroisopropylidene-bisphenol-co-4,4'-(2-norbornylidene) bisphenol) terephthalate-co-isophthalate . . . [claim 34].

Applicant is required under 35 U.S.C. 121 to elect **a single "a", "b", "c" or "d" from each of the elements I –VIII** disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 8, 21-27 and 35-36 seem to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

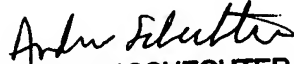

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Qi whose telephone number is (571) 272-2299. The examiner can normally be reached on M-T 8:00 am-5:00 pm.

Art Unit: 2871

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
